APPLICANT : SHIMADZU CORP;

INVENTOR : SHIBAHARA EIJI;

INT.CL. : F04B 23/02 F15B 1/00

TITLE : HYDRAULIC UNIT

ABSTRACT : PROBLEM TO BE SOLVED: To reduce an external form, facilitate maintenance and inspection, and increase earthquake resistance effectively.

SOLUTION: A tank 6 is installed on the bottom wall of a box 8 through its entire area so that the upper side of the tank 6 is open fully and a space inside the box 8 can be used effectively. Also all parts are arranged over the tank 6 so that the maintenance and inspection can be performed without removing the tank 6. In addition, these parts can also be fixed directly to the wall surface of the box 8, a load is not concentrated to one place and, because the tank 6 is positioned at a low level, the gravity center of the box 8 becomes lower and the mounting condition is stabilized.
